KATHMANDU MODEL SECONDARY SCHOOL
FIRST TERM EXAMINATION 2082

Class: XI 'Science'

Time: 3 hrs.

Subject: English [0031]

F.M.: 75

P.M.: 30

Candidates are required to give their answer in their own words as far as practicable. The figure in the margin indicated full marks.

Attempt all the questions.

1. Read the following text and do the activities that follow.

Jay Tee, 30, has been a drug addict since he was a teenager. He has tried to kick the habit many times; going in and out of rehabilitation centers. He managed to stay clean for a month before suffering a **relapse**. There are many drug addicts like Jay Tee. Why are they into it in the first place? It doesn't matter if you are white or black or Asian or Latin, every race has their share of drug abuse problems.

Some people say that it is due to the **perception** of drugs being "bad and illegal" and therefore something so irresistible that you just have to try it. Somehow, teenagers are more curious to discover the "forbidden fruit". Some manage to kick the habit early but there are many others who are trapped.

For many teenagers, drug abuse is a mere escape. They use drugs to get out of their misery, pain, confusion and loneliness. Some teenage drug addicts grow up without guidance from their parents, and so they resort to drugs. Some are physically or mentally abused and drugs become the only thing that they are able to count on. Many succumb to drug addiction because of the need to feel like they belong. They try drugs to please their friends or to be part of a group. Many teenage drug abusers are also low achievers in schools and have low self-esteem.

There are also teenagers who claim that they were first exposed to different kinds of drugs at parties and **discos**. These drugs were distributed freely the first few times and they kept coming back for more. As a result, many of them became addicted even before they knew it. In certain cases, these teenagers might resort to committing crimes to support their expensive habit.

One effective tool in the fight against teen drug abuse is communication. Troubled teens need some form of outlet from the problems or depression they are facing. Parents should take time out from their busy schedules to spend time with their children and listen to their problems. Communication, however, should go beyond words. Parents should show their children that they really care. Adequate parental **supervision** has also

been found to be a deterrent to drug use in youth. Parents should know who their children's friends are and what is going on in their social lives. School counselors should also play an active role in providing information on drug abuse and also provide emotional support. One common belief is that drug abusers should be able to stop taking drugs if only they are willing to change their behavior. However, drug addiction is a disease that affects the brain and because of that, stopping drug abuse is not simply a matter of willpower. Drug abuse can affect a person's self-control and ability to make sound decisions, and at the same time send **intense** impulses to take drugs. Through scientific advances, we now know that the abuse of drugs leads to changes in the structure and function of the brain and at the same time, we also know that drug addiction can be successfully treated to help people get over their addiction and resume productive lives. At the end of the day, the best way to prevent drug addiction is by educating teenagers about it. The more they learn about the bad effects, the less their excuses to take it. This may even **dissuade** them from using it.

A. Answer the following questions:

Candidates are required to give their answer in their own words as far as practicable. The figure in the margin indicated full marks:

Attempt all the questions.

1. Read the following passage and answer the questions that follow.

The newspapers have taken the place of the Bhagavad Gita, the Bible and the Quran with the people. For them, the printed sheet is gospel truth. The fact throws a great **responsibility** on the editors and the news writers.

Newspapers are a powerful **influence**. It is the duty of the editors to see that no false report or report likely to excite the public is published in their newspapers. The editors and their assistants have to be extra careful about the news they give and the manner in which they dress it. In a state of **Independence**, it is practically impossible for Governments to control the Press. It is the duty of the public to keep a strict watch on the newspapers and keep them on the right path. An enlightened public would refuse to patronize inflammatory or indecent newspapers.

Newspapers which indulge in untruth or exaggeration harm the cause they profess to espouse. I admit that there is enough untruth in enough newspapers to warrant action. But my experience is that no amount of public criticism will affect the policy of newspapers which make their livelihood by such policy... But I write this in no way to **condone** untruths in newspapers. I am quite clear that if newspapers weighed every word that is printed therein, we should have a speedier removal of abuses whether in the states or elsewhere.

The superficiality, the one-sidedness, the inaccuracy and often even dishonesty that have crept into modern journalism, continuously mislead **honest** men who want to see nothing but justice done.

The sole aim of journalism should be service. The newspaper press is a great power, but just as an unchained torrent of water submerges whole

countryside and **devastates** crops, even so, an uncontrolled pen serves but to destroy. If the control is from without, it **proves** more poisonous than want of control. It can be **profitable only** when exercised from within. If this line of reasoning is correct, how many of the journals in the world would stand the test? But who would stop those that are useless? And who should be the judge? The useful and the useless must, like good and evil, go on together, and man must make his choice.

A. Give short answers to the following questions in ONE SENTENCE each. [5×1=5]

- What have the newspapers taken the place of with the people?
- Who should ensure that false reports are not published?
